Goal Progress Report

Program: Learning Resource Centers

Report period: 2022 - 2023

Goals	Request & Justification/Resources	Goal Progress	Strategies Implemented & Follow-up
Provide access to library resources, materials, and services to support the curriculum achieved by maintaining current level of electronic resources and technology infrastructure. [Link to unit outcome: Library users will have access to library resources, materials, and services.]	Request renewal of digital and print subscriptions to library resources. Request renewal of all license agreements to the library technology suite.	Electronic and print resources subscriptions were renewed. Current library technology suite license agreements were renewed with no interruption of service or delivery.	Favorable usage statistics continue to drive decisions regarding our electronic resources. Usage statistics indicate online engagement and interaction remains high. [See attached usage statistics.] The LRCs launched email campaigns to make students aware of tutoring options as well as targeted campaigns based on major and courses enrolled. Delivery rate was approximately 90%.

			The library technology suite is still being used to assist departments within the college with dynamic scheduling and events management.
Provide library resources and services to support any scheduled accreditation renewals. [Link to unit outcome: Library users will find collections to be sufficient in quality, depth, diversity, format, and currency to support the college's teaching and learning initiatives.]	Request renewal of digital and print subscriptions to library resources. Request additional resources for the Veterinary Technology Program.	Electronic resources subscriptions were renewed, specifically those resources which support certain career programs who had scheduled accreditations in 2023. Journals in print were reduced dramatically as most are available electronically. An electronic resource supporting students in the Veterinary Technology Program was acquired and implemented.	The LRCs collection of electronic resources continues to strongly support our career programs. PocketPrep was added to assist both faculty and students in preparing students for the veterinary technician licensing exam. The LRCs will rely on feedback from the program director when considering renewing.
